

MLC

Uni-Boot Duplex Metal Bodied LC

Key Features

- Fully compliant to IEC 61754-20
- Heat resistant to 135° C
- Improved resistance to shock and vibration
- Superior latch and cable retention
- Compatible with industrial and military cables
- Available for MM, SM/PC and SM/APC
- Low loss stable performance

The MLC Uni-Boot Duplex Metal Bodied LC is precision manufactured from both machined and die-cast alloy materials. It provides an LC compatible connector able to withstand use in tough military and industrial application.

Upgrading from standard 'plastic' commercial connectors, the MLC is compatible with standard commercial cables as well as industrial and military tactical type cables. It features superior pull-strength/retention between the connector and the cable, plus the metal latch arms provide improved pull-out strength to the LC connector ports.

Applications

- Industrial
- Military
- Aerospace
- Marine
- FTTx deployments
